Ernest J. Greene, the bookkeeper for Reinhard in his home, No. 719 Lexington-ave., Brooklyn, accounted for about \$3,000 of the money which his employers knew they had lost, but he tried to shield John F. Collins, the firm's cashier, with whom he had been in collusion. Collins was arrested at the firm's office yesterday afternoon. He also made a confession, and it then appeared that he had taken about \$10,000 from his employers chiefly by means of forged checks. Either Collins or Greene would erase by acids from checks made out to a customer the name of the payee, and substitute "bearer."

The dishonest employes would get the checks cashed and pocket the money. THE AHEARNS HAD A GOOD TIME.

The day was spent in games and feasting, which all sires and conditions of humanity in Senator Ahearn's district enjoyed. On the return in the evening, the march back from the steamboat pier to headquarters was a continued ovation for Ahearn. A number of social and political organizations with tends of music joined the

A Remedy of General Utility.

It is among the follies of which the manufacturers of many propeletary medicines are guilty to term their medicines "panaceas," or to claim fet them the quality of panaceas. There is no such filing as a "panacea," which means a remedy adapted to all diseases. This absurdity has never been perpetrated by the proprietors of Hostetter's Stomach Sitters. But they do claim, and with justice, that it is a remedy of general writty, and this because it restores that require and utility, and tals because it restores that regular and vigorous condition of the stomach, liver and houses which conduce to the recovery of general health. Thus it endemic mainty like the discussion and double purpose by stimulating activity of the kidneys, since it not only prevents their disease and decay, but expels from the blood through them impurities that cause matism, gout and dropsy. Whiskey market remains steady; sales of distillers' goods on a basis of \$112 per gallon were 475 bbls.

Minneapolis, Sept. 25.—The wheat market was active but lower to-day. There were large selling orders received from outside and local elevator companies sold largely, their sales being as a hedge against their cash purchases, roreign markets were quoted weak, with buyers indifferent. The visible supply showed an increase of 1,362,900 leush. This was less than expected and helped to check the weakness. Clearances, however, were smaller. The amount of wheat on passage to Europe decreased 1,104,000 bush. Good rains were reported in the Eastern and Southern winter wheat country and were an element of weakness. The action of the Senate is beginning to cause uneasiness, and tends to check any fresh buying for speculative account. The bear argument now is the large supplies abroad and at home and the fact that the visible supply has started on an increase, both here and in Europe. Still the increase is much less than it was a year ago, while the weekly exports average much neavier.

The cash wheat market was active; supply was heavy, but the demand was large and business brisk. Prices were lower in sympathy with futures. SEATly sales were tre highest. Coarse grain, especially oats and barley, in large supply.

There was a ready demand for everything offered except new smutty wheat. This was slow to sell.
